

Group B Assignment -6

Create simple objects and array objects using JSON.

```
package json;

import org.json.simple.*;

import java.io.*;

public class Json {

    public static void main(String[] args) {

        JSONObject obj = new JSONObject();

        obj.put("name", "xyz");

        obj.put("age",30);

        obj.put("Designation","Asst.Prof");

        obj.put("Exp",10);

        JSONArray list = new JSONArray();

        list.add("1234567892");

        list.add("9123456789");

        obj.put("phone", list);

        JSONArray address=new JSONArray();

        address.add("MCOERC,Nashik");

        address.add("Nashik");

        obj.put("address",address);

        System.out.println("JSON Object Getting Created Successfully");

        System.out.print(obj);

    }

}
```

Output:

JSON Object Getting Created Successfully

```
{"Designation":"Asst.Prof","address":["SAE  
Kondhwa,Pune","Pune"],"phone":["8975747465","9511581268"],"name":"Kiran","Exp":10,"age":30}
```
